

Andrea Foresi, 1° Year PhD student.

I was born in Livorno, Italy, on 4 June 1997.

I speak Italian with an ugly accent from my hometown and I'm improving my English.

Parallel to my study and educational life I practice track and field and I give private lesson to high school student.

Education

I studied at a scientific high school in Livorno, graduating in 2016, and I spent the next years studying Physics at the University of Pisa. I specialized my studies during the master degree in Particle Physics and Fundamental Interaction.

PhD Project Information

- I am part of the SWEATERS collaboration.
- Study the solar wind and magnetosphere interaction detecting Energetic Neutral Atom (ENA).
- We develop a MICROME GAS for low energetic atom detection [1-100]keV and 3D track reconstruction.
